Abstract
[Provide a concise summary of the study]

Keywords
[List 4-6 keywords that represent the article content.]

Introduction
[Provide a detailed background of the study, including relevant literature review, the problem being addressed, and the study's objectives.]

Literature Review

Methods and Materials
[Describe the study design, settings, participants, inclusion/exclusion criteria, materials used, and statistical methods. The section should be detailed enough for another researcher to replicate the study.]

Results / Analysis
[Present the study findings with appropriate data analysis. This section may include tables, figures, and other visuals as necessary. Provide a clear, concise narrative that summarizes the key findings.]

Discussion

[Interpret the results in the context of existing literature. Discuss the implications, limitations, and possible avenues for future research.]

Conclusion

[Summarize the main findings and their relevance to medical science or clinical practice. Include any recommendations or potential applications of the findings.]

References

[List all the references cited in your article in the appropriate format (e.g., APA, AMA, or specific formatting required by Cureus). Ensure all references are current and relevant.] Prior to converting your references, please ensure they are formatted as follows:

---

Figures and Tables

[Include any figures or tables referenced in the text. Each should have a descriptive caption. Ensure all visuals are high quality and legible.]

Note (1. The figure should be of good resolution clear labels on both axes 2. Table's fist row should be Header)

Conflict of Interest Statement

[Declare any potential conflicts of interest or state "The authors have no conflict of interest to disclose."]

Note: Text format: Times New Romans, Text size:12
